## EDUCATION

**Bachelor of Science, Computer Science**, Sept 2021 – Apr 2025

University of Saskatchewan, Saskatoon, SK

GPA: 3.2 / 4.0 • **Relevant coursework:** Data Structures & Algorithms, Database Systems, Operating Systems, Software Engineering, Object-Oriented Systems Design, Artificial Intelligence

## CERTIFICATIONS

- Microsoft 365 Certified: Microsoft
- ITIL Foundation: Udemy · Jan 2026 – Jan 2028
- Digital Marketing: Google · Aug 2024 – Dec 2034
- AWS cloud practitioner essentials - AWS
- Claude Code: Anthropic
- COMP TIA+—currency working on

## TECHNICAL SKILLS

**Programming Languages:** Java, Python, JavaScript, C++, SQL, HTML/CSS

**Frameworks & Libraries:** React.js, Node.js, Express.js, Fast API, Flask, TensorFlow, Pandas, NumPy, Matplotlib, VADER

**Databases:** MongoDB (Compass and Atlas), MySQL, PostgreSQL

**Systems & Networking:** Linux CLI, TCP/IP, Network Troubleshooting, REST APIs

**Developer Tools:** Git, GitLab, Docker, JWT, CI/CD, Vercel, Render

**Operating Systems:** Windows, Linux, PowerShell, iOS

**IT Service Management:** Jira, Incident Management, Technical Documentation, ITIL, Agile/Scrum, Microsoft 365

## WORK EXPERIENCE

**Data Analyst Intern — Code Alpha, Remote**

*Oct 2026 – Nov 2026*

- Completed four analytics projects using the Amazon Fine Food Reviews dataset, analyzing **568,000+ customer reviews**.
- Performed exploratory data analysis on rating distributions, review length, helpfulness, and customer activity patterns.
- Cleaned and transformed review text, timestamps, data types, and helpfulness metrics; removed invalid and duplicate records.
- Built Python, Pandas, and Matplotlib visualizations and applied **VADER sentiment analysis** to classify feedback and identify recurring themes.

**Theatre Manager—Cineplex Entertainment, Regina, Sk**

*Aug 2025*

- Supervise and coach **25+ employees** across guest services, concessions, retail, and entertainment operations.
- Implemented workflow and staffing improvements that reduced wait times by **18%** and improved labour efficiency by **10%**.
- Analyze weekly sales, staffing, and customer-feedback trends to support operational decisions and contribute to **8–12% sales growth**.
- Resolved **200+ customer escalations** with a **95% satisfaction rate**, contributing to promotion within nine months. (Nov 2024 to August 2025)

**Software Development Mentor—University of Saskatchewan, Saskatoon, SK,**

*May 2024–Dec 2024*

- Mentored **25+ students** in debugging, algorithms, object-oriented design, and problem solving.
- Reviewed **100+ codebases** and helped resolve **70+ project blockers** through technology and Git workflow guidance.
- Managed seven Git repositories and supported project documentation and technical portfolios.

- Diagnosed and resolved **75+ hardware, software, and TCP/IP issues** via phone, email, and remote support.
- Achieved a **92% first-contact resolution rate**, reduced repeat tickets by 25%, and met SLA targets 98% of the time.
- Documented troubleshooting in Jira, contributing **80+ knowledge-base articles** and reducing on-site visits by 40%.

## PROJECTS

---

### 1) Review Lens — Customer Review Intelligence Platform

*Python, Pandas, NumPy, VADER, Matplotlib, Jupyter Notebook, Fast API, React*

- Built an analytics project around **568,454 Amazon Fine Food reviews** to uncover patterns in satisfaction, ratings, helpfulness, and customer behaviour, with frontend interaction for the business members.
- Performed data cleaning, exploratory analysis, and VADER-based sentiment classification across positive, neutral, and negative feedback, which is an extension to the project did during my internship.
- Created visualizations linking sentiment, ratings, review length, helpfulness, products, and customer activity.

GitHub: <https://github.com/Haard-Patel/ReviewLens>

### 2) IT Service Desk & Incident Management System — Full-Stack ITSM Platform

*React.js, TypeScript, Node.js, Express.js, MongoDB/PostgreSQL, JWT, Docker*

- Built a **lightweight IT service desk and incident management platform** modeled on ServiceNow/Jira Service Management, covering the full ticket lifecycle.
- Implemented **JWT-based authentication** with role-based access control (RBAC) for end users, technicians, and admins.
- Designed a **status workflow** (Open → In Progress → Resolved → Closed) with Low/Medium/High/Critical priority levels and ticket assignment to technicians.
- Built a technician dashboard with search, filter, and sort, plus an admin dashboard with charts for ticket volume and SLA performance.
- Added internal notes, file attachments, email notifications, SLA tracking, and a full ticket history/audit log.
- **Developed a knowledge-base module and REST API** to support self-service and third-party integrations.

### 3) NutriTracker — Full-Stack Health and Nutrition Web Application

*React.js, Node.js, Express.js, MongoDB, Flask, TensorFlow, JWT, Twilio, GitLab, Docker*

- Built MVP FOR a **full-stack health and nutrition tracker** with a React.js frontend and Node.js/Express.js backend, storing data in MongoDB.
- **Implemented JWT authentication and REST APIs** to secure user access and connect components.
- **Integrated Flask + TensorFlow chatbot** for AI-assisted nutrition and fitness recommendations.
- Collaborated in a **4-member team using GitLab and Docker** to standardize the development environment.
- Optimized **API performance** and reduced latency by 30% through efficient request handling.
- Designed a normalized **MongoDB schema** for user profiles, meal logs, and progress tracking to support efficient, scalable queries.
